Semester-II

A) Course Code : 2000271(046)

B) Course Title : Communication Skills-II

C) Pre- requisite Course Code and Title

D) Rationale :

In the present competitive world communication skills are vital for growth in any field. Communication Skills in English is one of the core skills to be developed in diploma graduates as students exchange information and convey their ideas and opinions with different stakeholders The present curriculum continues to focus on the attainment of course outcomes related to speaking, reading, writing and listening as verbal, non-verbal and written communication are essential in order to deliver and receive information quickly and accurately.

This curriculum is advancement over the previous to meet the existing industrial and entrepreneurial challenges by focusing on the attainment of professional communication skills and enable the students for effective communication in diverse situations.

E) Course Outcomes:

- CO-1 Use grammatically correct sentences in Speaking and Writing.
- CO-2 Demonstrate appropriate non-verbal expression while communicating with others.
- CO-3 Compose paragraphs and draft letters using correct formats.
- CO-4 Draft different types of report, notices and mails in prescribed format.

attainment by the students through Classroom Instruction (L), Laboratory Instruction (P), T- Tutorial includes Sessional Work (SW) and Self Learning (SL). Students are expected to demonstrate the attainment of Session Outcomes (SOs) and finally Course Outcomes (COs) upon the completion of course.

CO-1 Use grammatically correct sentences in Speaking and Writing.

(Hours-12)

Session Outcomes (SOs)	Laboratory Instruction (P)	Class room Instruction (L)	Self Learning (SL)
SO1.1 Use modifiers in proper place SO1.2 Use auxiliaries SO1.3 Change Narration SO1.4 Use different degree in sentences SO1.5 Correct Use of Adverbial Phrases.		Unit-1.0 English Grammar 1.1 Auxiliary Verbs 1.2 Modifiers & Adverbial Phrases 1.3 Degree 1.4 Narration	 One Word Substitution Rearrangement of Jumbled words

SW-1 Suggested Sessional Work (SW):

a. Assignments:

i. Exercises on the topic: Modifiers, Narration, Degree etc.

b. Mini Project:

- i. Express your views by writing an incidence using proper grammar.
- ii. Select topic and share your views on the same with the audience. (2-3 min.)

c. Other Activities (Specify):

i. Practice for speaking skills in front of mirror for self feedback.

CO-2 Demonstrate appropriate non-verbal expression while communicating with others in different situations.

SO2.1 Explain the features and use of static and dynamic features of non verbal communication. SO2.2 Interpret the gesture, posture and facial expression in the given photograph and visual.	LE2.1 Use appropriate gestures, eye movements, facial expressions, postures for communication. LE2.2 Demonstrate appropriate etiquettes while working in team and group.	Unit-2.0 Non-Verbal Communication 2.1 Static features of Non Verbal Communication — Distance, Posture, Physical contact etc. 2.2 Dynamic features of Non-Verbal Communication — Mannerism, Head & Hand movement, Eye to Eye contact, Facial expressions, Gestures.	 Collect data about good postures, expressions, visuals related to non verbal communication for Effective Communication. Imitate your ideal personality.

SW-2 Suggested Sessional Work (SW):

a. Assignments:

- i. Collection of pictures and visuals with static and dynamic features of non verbal communication.
- ii. Interpretation of gesture, posture and facial expression in the given photograph and visual.

b. Mini Project:

i. Seminar on topics related to "Role of non verbal communication for developing effective communication in technical education".

c. Other Activities (Specify):

i. Role play on given theme such as: When a student gets exceptionally good marks or less marks in 10th board exams, bank manager refuses to sanction the education loan at the last moment, unrest among the first year students during fresher party. Student and teacher can add the themes as per requirement.

CO-3 Compose paragraphs & draft letters, using correct format.

SW-3 Suggested Sessional Work (SW):

a. Assignments:

- i. Write an application to apply for campus recruitment drive to be held in your college.
- ii. Draft business letters.

b. Mini Project:

- i. Prepare Resume and cover letter for job vacancy.
- ii. Write a letter to appropriate authority informing about the activities to be conducted in Department/Institute.

c. Other Activities (Specify):

i. Analyze the given case and suggest views/opinion with respect to case brief.

CO-4 Draft different types of reports notices and mails in correct format.

SW-4 Suggested Sessional Work (SW):

a. Assignments:

- i. Prepare notice for your class/department as per given directions.
- ii. Describe qualities of a good report.
- iii.Draft a progress report of any assumed work.

b. Mini Project:

- i. Draft a report on any significant activity that had taken place in your locality.
- ii. Draft a report on culture event/ sports event conducted at your institute.

c. Other Activities (Specify):

i. Draft notices for sports activities/ lost belongings/ various competitions/celebrations.

Note: Performance under Laboratory and Sessional work may appear in more than one COs/SOs.

Semester-II

A) Course Code : 2000272(014)
B) Course Title : Applied Maths-II

C) Pre- requisite Course Code and TitleD) Rationale

This subject is introduced to those topics of mathematics, which are applied in different branches of engineering so that it can enhance required skills in mathematics underpinning engineering subjects. Integral calculus helps to find the area; differential equation is used in finding the curves and its related applications for various engineering models. Numerical integration is used to find the area of the functions especially whose integration cannot be evaluated easily with routine methods. This course further develops the skills to enable large engineering systems to be modeled.

E) Course Outcomes:

- CO-1 Solve the given problems of integration using suitable methods.
- CO-2 Use the concept of integration to find area of given curves.
- CO-3 Model the given engineering problems using the concept of differential equation.
- CO-4 Utilize the concepts of numerical methods to solve given equations.
- CO-5 Measure the area using the concept of numerical integration for engineering related problems.

B) Course Title : Environmental Engineering and Sustainable Development

C) Pre- requisite Course Code and Title :

D) Rationale : The world has changed drastically during the last half century, both technologically, economically and socially. In present time, solid waste, e-waste, air pollution, water and land pollution and conservation of natural resources wants more attention. The growth of multinational businesses, the depletion of national and natural resources, and the tremendous advances in technology in many countries raised concerns over issues of Environment climate Change and Sustainable Development. We are also witnessing the emergence of Green and Clean Technology for Sustainable Development. In this context, the understanding about environment issues and challenges is very essential for engineers as it guide for sustainable development.

The knowledge and application of such aspects is essential in developing a good technician who should be conversant with the core concepts, principles and practices of environment pollution problems and sustainable development (SD).

This course is designed to serve as foundation knowledge for diploma studies in Engineering. It will introduce the concept of environmental issues, problems due to pollution and social & economical dimensions including disaster management for SD. The future engineers must use 3R concept by focusing on changing patterns of Engineering Design, Production, Consumption, and use of natural and non conventional energy resources optimally and judiciously by enforcing laws and legislatives during any engineering projects.

E) Course Outcomes:

- CO-1 Describe causes, prevention and remedial measures of water and air pollution.
- CO-2 Explain causes, prevention and remedial measures of Soil, Noise, Thermal and Nuclear pollution.
- CO-3 Create awareness about sustainable development and clean technology.
- CO-4 Perform Environmental Impact Assessment (EIA) for new design and project
- CO-5 Create awareness for social issues and the environment.

A) Course Code : 2000274(015)
B) Course Title : Applied Physics

C) Pre- requisite Course Code and Title : D) Rationale :

Engineering diploma holders have to deal with physical properties of various materials, measurements of physical quantities, basic tools, and maintenance of machines in the industrial environment. Diploma holder must have a skill to apply the knowledge of basic concepts and principles of measurements, mechanics, waves, properties of materials, motion, friction, fluid mechanics, optics, optical instruments, electricity, magnetism and modern physics in solving broad based engineering problems. This course of engineering physics helps diploma engineers to achieve the course outcomes and provide sound background for self-development in future to cope up with new innovations.

E) Course Outcomes:

- CO-1 Estimate errors in measurement of physical quantities.
- CO-2 Solve mechanics related engineering problems by applying the knowledge of forces and properties of materials.
- CO-3 Solve engineering problems using relevant optical equipment by applying the principles of ray optics.
- CO-4 Apply concepts of electrostatics, magnetism and electricity to solve engineering problems.
- CO-5 Solve engineering problems by applying the knowledge of modern physics.

A) Course Code : 2000275(037)

B) Course Title : Basic Non Conventional Energy Sources

C) Pre- requisite Course Code and Title :

D) Rationale :

In the context of rapidly depleting fossil fuel resources and increasing power demand along with environmental concern it is imperative to look for the alternative sources of energy. Non conventional energy sources are feasible options to cope up the need to develop sustainable energy systems. It is hoped that with the advancement in technology and research efforts in the field of development of non-conventional sources of energy, these sources may prove to be cost-effective as well. The future of Wind, Solar, tidal and other energy sources is bright and these will play an important role in the world energy scenario and future employments. This course aims at developing the ability in the students to cope up with the working, construction and maintenance aspects of machinery, devices and components associated with these systems.

E) Course Outcomes:

- CO-1 Explore the role and prospects of non-conventional energy sources.
- CO-2 Explain construction, working and maintenance of Solar energy devices and components.
- CO-3 Describe construction and working of Wind energy related systems and subsystems.
- CO-4 Explain construction, working and maintenance of Biomass plants.
- CO-5 Describe construction and working of Geothermal, OTEC, Tidal and Micro Hydel energy systems and subsystems.
- CO-6 Explore the utility of fuel cell and hydrogen energy in various areas.

A) Course Code : 2000276(022)

B) Course Title : Computer Fundamentals and Applications

C) Pre- requisite Course Code and Title:
D) Rationale:

This course will enable diploma engineers to use computers and different applications for various computing purposes. It will enable technicians to perform for day-to-day computing activities, in particular-preparing professional documents, analyzing details graphical representations, and multimedia presentation for time to time decision making by the management of academia, business and industry. They would also be able to use Internet, cloud services and its security features for effective computing.

- **E) Course Outcomes:** The course content should be taught and implemented with the aim to develop the following outcomes in the students.
 - CO-1 Use effectively computer system and its peripherals.
 - CO-2 Prepare a professional document using various features of word-processing for academic/business/ industry.
 - CO-3 Create a spread sheet, analyze the data using different formula/ functions and represent it in different form of chart for solving academic/business/industrial problem.
 - CO-4 Create a professional multimedia presentation using its various features for an academic/business/ industrial application.
 - CO-5 Use Internet, Cloud services, and its security features for computing.

SW-5 Suggested Sessional Work (SW)

a. Assignments:

- i. Explain Different type of networks
- ii. List the basic features of cloud network

b. Mini Project:

Prepare report on computer network, devices, antivirus and firewall software installed in the laboratory.

c. Other Activities (Specify)

- i. A seminar on 'Computer Antivirus'
- ii. A seminar on 'Computer Firewall'
- iii. A seminar on 'Overview of Cloud Computing'

Note: Performance under Laboratory and Sessional work may appear in more than one COs/SOs.

Leadership) skills

C) Pre-requisite Course Code and Title:

D) Rational :

Technical Writing and Presentation Skills are core skills to be developed in diploma graduates as students exchange information and convey their ideas and opinions with different stakeholders. Students in technical institutes need to be trained for this. The focus of the course is to develop a wide variety of soft skills starting from communication, to work in different environments, developing emotional sensitivity, learning creative and critical decision making, developing awareness of how to work with and negotiate with people The key areas addressed are conversation skills, group skills, persuasion skills, presentation skills, personal grooming, positive thinking and vocational skills

E) Course Outcomes:

- CO-1 Exhibit impressive personality in society.
- CO-2 Explore different Leadership skills and Team work
- CO-3 Develop different skills of group discussion.
